

KANISHK GANDECHA

Software Engineer | Full-Stack & iOS Developer

Mumbai, India | +91 95615 00052 | kanishk.gandecha09@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

SUMMARY

Computer Engineering student and software engineer building native iOS and full-stack systems with Swift/SwiftUI, React/TypeScript, Node.js, PostgreSQL, and MongoDB. Developed a privacy-focused event platform with safe real-device legacy migration, 749 unit/integration tests, and 98 UI tests, alongside code-intelligence, real-time F1, and medical-visualization projects.

EDUCATION

B.Tech in Computer Engineering | K.J. Somaiya College of Engineering, Mumbai

Jul 2023 - Present

CGPA: 8.23/10 | Class XII: 72.6% (2023) | Class X: 88.6% (2021)

EXPERIENCE

Software Development Intern | MedMarvel Software Solutions Pvt. Ltd.

Jun 2026 - Jul 2026

- Built responsive React and TypeScript frontend features, Node.js/Express REST APIs, and role-based access controls for an enterprise medical software platform.
- Developed browser-based medical visualization and interactive 2D/3D rendering workflows using Three.js and Niivue.
- Collaborated on application architecture, performance optimization, reusable UI components, defect resolution, code reviews, and Git-based team workflows.

Freelance Full-Stack Developer | Wholesale Agricultural Vendor

Dec 2025

- Built a billing and invoice management system that digitized manual records and supported multi-vendor transaction workflows.
- Implemented a React/TypeScript frontend, Node.js/Express APIs, role-based access, and database schemas for business records.

3D & Interactive Media Lab | K.J. Somaiya College of Engineering

Academic Experience

- Created interactive 3D prototypes and media workflows using Unity, Blender, and Lens Studio, gaining hands-on experience with 3D assets, scene composition, and application integration.

PROJECTS

Kue 2.0 - Privacy-Focused iOS Event Planner | Swift, SwiftUI, SwiftData, WidgetKit, ActivityKit, EventKit, XCTest

- Built a native iOS event planner with recurring events, tasks, reminders, widgets, Live Activities, Calendar integration, OCR, voice input, and explicit outcome tracking.
- Engineered a fail-closed Kue 1.0 migration using metadata verification, SQLite-safe backup, rollback, and durable-store validation; preserved real iPhone data through migration and relaunch.
- Delivered zero-warning app, widget, share-extension, and personal builds backed by 749 unit/integration tests and 98 UI tests with zero failures.

Developer Platform v1.0 | Next.js, TypeScript, Fastify, PostgreSQL, pgvector, Redis, BullMQ, Docker | [GitHub](#)

- Released a production-ready code intelligence platform that securely ingests GitHub repositories, performs AST-based static analysis, builds dependency graphs, and provides hybrid semantic/lexical code search.
- Orchestrated seven parallel AI analysis agents with BullMQ and implemented GitHub OAuth, encrypted tokens, ownership checks, retry recovery, automated tests, and Docker Compose deployment.

MediLink - Hospital Management System | React, Node.js, Express, MongoDB, REST APIs | [GitHub](#)

- Built and deployed a MERN hospital platform with protected APIs and role-specific workflows for eight user types across appointments, pharmacy, billing, wards, lab reports, and staff management.

F1 Live Platform (In Development) | Next.js, TypeScript, Fastify, PostgreSQL, Prisma, SSE | [GitHub](#)

- Building a Formula 1 monorepo with web, API, and ingestion services and a real-time pipeline through PostgreSQL LISTEN/NOTIFY and Server-Sent Events to browser updates.

SKILLS

Languages: Swift, JavaScript, TypeScript, Python, PHP, SQL | **Frontend:** SwiftUI, React, Next.js, HTML, CSS, Tailwind CSS

Backend & Data: Node.js, Express, Fastify, REST APIs, PostgreSQL, MySQL, MongoDB, Redis, Prisma

iOS: SwiftData, WidgetKit, ActivityKit, App Intents, EventKit, Vision, Speech, XCTest

3D & Visualization: Three.js, Niivue, Unity, Blender, Lens Studio, interactive rendering

Tools & Concepts: Git, GitHub, Docker, BullMQ, OpenAI APIs, DSA, OOP, DBMS, RBAC, performance optimization
